Planned Maintenance

APS Distributor Planned Maintenance Programs for Dock Levelers, Trailer Restraints, Seals/Shelters and Doors

Planned Maintenance Programs:

- ▼ **Improve Safety**
- ▼ **Reduce Truck, Building and Product Damage**
- ▼ **Eliminate Energy Loss**
- ▼ **Improve Productivity**
- ▼ **Decrease Expensive Downtime**
- ▼ **Eliminate Expensive Repair Bills**

Protect your investment at the loading dock. Let Authorized Technicians do a thorough and professional job maintaining your dock equipment. Malfunctioning equipment can result in serious accidents. A regularly scheduled maintenance program can uncover potential problems before they happen and keep your dock equipment in proper operating condition.

Routine, professional planned maintenance results in increased productivity, improved safety, energy savings, fewer worker injuries and reduced costs for equipment and building repair. Planned Maintenance Programs make it easy. Distributor authorized technicians will inspect, clean, lubricate, and adjust your leveler for optimal performance. Technicians will inform you of any needed service or replacement parts and make additional money-saving recommendations.

In the event of repairs or upgrades, APS Resource stocks the leading manufacturers' brands of dock leveler and trailer restraint parts including replacement parts for your DOKLOK® restraint. APS Resource has universal solutions for virtually all dock leveler brands as well as a complete line up of aftermarket parts and accessories. APS Resource replacement parts are guaranteed to be of equal or better quality than OEM parts and can save you money.

- ▼ **Programs available for Dock Levelers, Trailer Restraints, Seals and Shelters, and Doors**
- ▼ **Quarterly, semi-annual or annual programs offered**
- ▼ **Service parts for all major manufacturers**

Conversion Kits

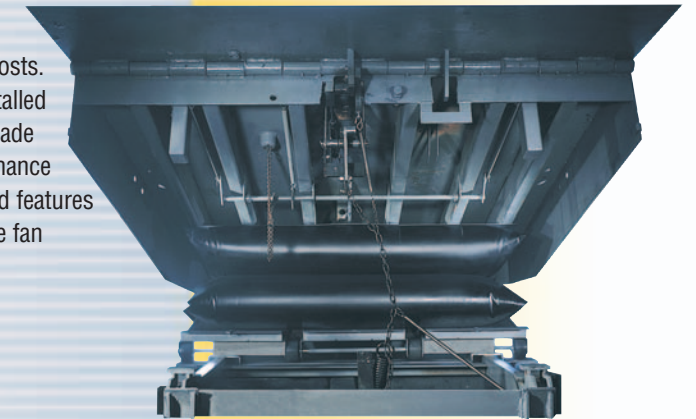

ATC Air Technology Conversion Kit

Breathe New Life Into Your Old Dock Leveling System With State-of-the-Art Air Technology

The patented ATC Air Technology Conversion Kit will extend the life of your old dock leveler and make it more efficient while lowering your operating costs. The ATC Kit converts levelers of most major manufacturers and can be installed easily. Plus ATC's technology is proven safe. The airbag lifting module is made of tough, PVC-coated polyester fibers that operates without loss of performance in temperatures from -65° to +200° F, even if the bag is punctured. Standard features include: push-button station, high visibility maintenance strut, low-pressure fan motor, removable lifting bag assembly, and lip extension mechanism.

ATC Features and Benefits

- ▼ **Easy push-button operation is user-friendly**
- ▼ **Simple design for ease of operation and low maintenance**
- ▼ **Ergonomic design increases safety and productivity**
- ▼ **Proven technology – tested fully effective at over 200,000 cycles**
- ▼ **Climate-proof**
- ▼ **Environmentally friendly**
- ▼ **Lowest lifetime ownership cost**
- ▼ **Full-range telescoping toe guards (if not already installed)**
- ▼ **Secondary OSHA yellow maintenance strut**
- ▼ **110 Single Phase**
